

Over the past several weeks, we have been learning about coronavirus (COVID-19), its effects on the global community and the communities in which we live and do business. At Helmutz Landscape & Interlock, the health and safety of our customers, partners and employees are our foremost concerns. We are closely following recommendations by the WHO other Canadian and American health authorities to do our part in helping to minimize the risk of the virus spreading.

Taking care of our customers and employees remains a priority for us, and it is our intent to ensure minimal disruption to day-to-day business as our clients and staff are at the center of everything we do here at Helmutz Landscape & Interlock. For the duration of the period where COVID-19 remains a threat, we have implemented the following protocols aimed to ensure both your safety and that of our employees:

- Additional communication and practices regarding health safety measures
- Enhanced cleaning and sanitizing of high contact areas
- Limiting face to face interaction during our design and quoting process
- Increased phone, and e-mail communications

**Have a project on the horizon?** We still want to hear from you by phone and e-mail. Where on-site measuring and discussions are required, we, together (client and designer), will create a plan best to manage this time.

Thank you & keep creating!

-The Helmutz Team.
